

The Sidekick™

Patent Pending

Premier's **The Sidekick** jumbo pack gives the professional installer a new and easier way to purchase and use carpet seaming tape. This handy stackable dispensing package offers the convenience of having two jumbo rolls of carpet seaming tape on the jobsite. This dispenser keeps the tape rolls stored neat, and clean until the next time they are needed. No more beat up half rolls of carpet tape scattered across the floor of the van. No more running out of tape in the middle of the day, and having to drive across town to pick up another roll of tape. Premier's **340 High Performance** and **460 Supreme Hot Melt Tapes** are available in The Sidekick jumbo packs.

The Sidekick not only looks professional, but it also saves you time and money. The reinforcing divider inside The Sidekick gives each 100 foot roll of tape its own package cavity that protects the rolls from damage in shipment, and handling.

Each Sidekick has a handy tray at the bottom of the box that the tape feeds through. Simply remove the tab, find the roll end and pull through the amount of tape needed to make the seam. Best of all is the fact that the tape can be pulled along the seam path directly from the dispenser. This saves time, and makes the job easier. See illustration for instructions on using this easy new tape placement method.

- Professional GREEN packaging made from recyclable paper
- Reusable box
- Neat stackable package
- Slotted sides allow you to see how much tape is remaining
- Easy carry handle
- Dispenses tape straight down the middle of the carpet seam
- Stable package design doesn't slide around during tape dispensing
